INTRODUCTION

Every year news flashes in newspaper and television during the time of examination that the exam is being postponed/cancelled due to the leakage of question papers.

Many times the leakage of question papers will not be known to the universities. In such conditions some students get good ranks by these leaked papers and those students who had worked hard have to compromise with less rank.

This factor will have negative effect on the growth of the society. Thus by considering the problems faced by the students and society, a system has to be implemented which will help to detect and prevent the leakage of question papers.
